

WATER & AIR JETTING DESCRIPTIONS

Water Jet Systems

A whirlpool bath should be anything you want it to be, and everything you need it to be; whether for therapeutic value, a fashion statement, a finishing touch, a mood setter, or an investment.

Our whirlpool baths come equipped with:

- A 3/4 HP 110V pump, requiring a 15 amp GFI.
- A Single Touch On/Off air switch for ease of operation.
- An adjustable air turbulence control to vary the intensity of the massage.
- Colour matched trims for all jets and controls.

To allow you to customize your whirlpool experience, we also provide the following upgrades:

- Adjustable or Micro Massage Jets
- Inline Heaters
- Variable Speed Pumps
- Optional upgrades to Chrome or Brushed Nickel to match your bathroom decor
- Optional Touch Sensor Control Pads

WATER & AIR JETTING DESCRIPTIONS

Air Jet Systems

Air jet systems provide a total body massage experience, surrounding you in thousands of tiny pre-heated bubbles of air. Our air systems are quiet, yet powerful; designed to operate with minimal vibration so not to interrupt your bathing experience.

Each of our Air Jet systems is exceptionally hygienic, with each jet having its own check valve to prevent water from flowing into the system. In addition, each system is pre-programmed to purge and dry the system after each use.

Lateral Air

- 16 jets in colour with a colour matched finish, upgradable to chrome or brushed nickel.
- A deck mounted touch sensor control pad, upgradable to a remote control.
- A 120v, 300w blower with an internal heater, requiring a 15 amp GFI.
- Available with a remote location kit to allow you to move the blower away from the bath.

Vertical Air

- 12 jets in colour with a colour matched finish, upgradable to chrome or brushed nickel.
- A deck mounted touch sensor control pad, upgradable to a remote control.
- A 120v, 300w blower with an internal heater, requiring a 15 amp GFI.
- Available with a remote location kit to allow you to move the blower away from the bath.

Illusion Air

- A discrete option, where 16 tiny holes are positioned around the tub.
- Only available with a variable speed blower, internal heater and a touch sensor control pad.
- This system is available in either a lateral air or vertical air layout.
