ROMA

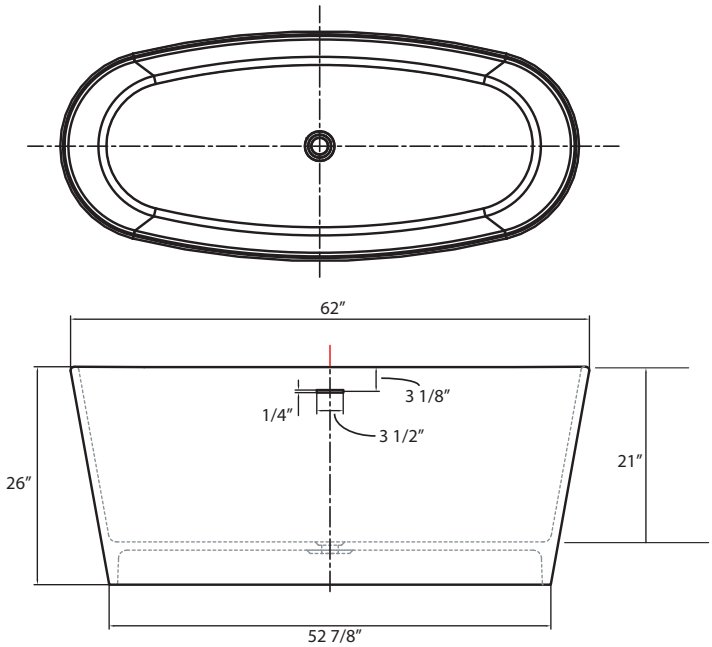
Italian Designer Composite Bathtubs
62” x 27 1/2” x 26”

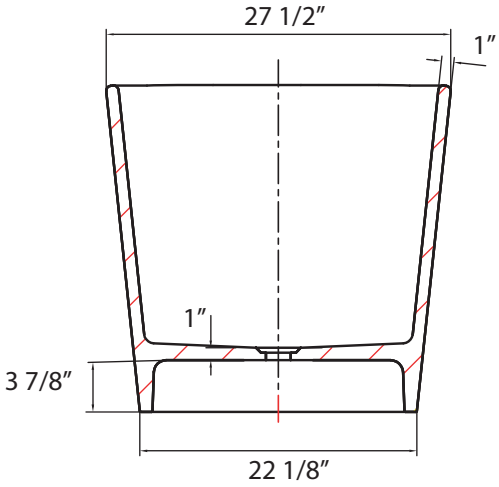
This bathtub is shipped fully assembled with a integral overflow.

Each bathtub in this new series is made from a formula of synthetic and natural materials, and finished with a polyester blended coating; designed to be resistant to scratching, scuffmarks, and UV rays.

Due to the nature of the composite material and the 3/4” thick walls, these baths provide excellent insullation, keeping bath water warmer for a longer period of time.

*1 year limited manufacturer’s warranty included





All measurements ± 1/4”
