Alcove Bath Upgrades

Chromatherapy

Immerse yourself in a sea of light created by a dual mini-light Chromatherapy system. Bathers can choose between red, orange, yellow, green, blue, turquoise, and magenta, or cycle through a range of 9 blended colours. Combine Chromatherapy with a massage system to create a total spa experience.

Lateral Air

16 jets mounted around the perimeter of the bathing well infuse the water with a soothing stream of massaging bubbles. A ceramic heating core preheats the air as a 600-Watt Panasonic™ blower delivers a steady stream of warm air bubbles to the bather. Use the variable speed control pad to vary the intensity of the massage to your mood.

Enjoy peace of mind in knowing that all blowers are preprogrammed with an auto-drying cycle to clean and dry the system after every use.

HydroMassage

The hydromassage is the most vigorous of all available jet upgrades, featuring a $\frac{3}{4}$ hp high efficiency pump. Bath water circulates through 6 or more adjustable jets to deliver targeted massaging action with variable levels of intensity. Upgrade this massage system by adding additional jets or adding an in-line heater to help maintain your bath's water temperature.

ComfortWarm™

ComfortWarm™ uses radiant heat technology to directly heat the surface of the bathtub's backrest. Use the three heat settings to adjust the heat intensity at any time with a simple press of the electronic touchpad.

VIBE Sound

The Vibe System allows you to enjoy your music or radio at the touch of a button in your shower or bathtub. The vibes of the music are synchronized with a Chromatherapy system that will change colors in synch with every beat of your favorite music.

Aromatherapy

Only a few drops of fragrance are needed. The system works using a pump which leads the air towards the receptacle which is filled with a combination of water and a few essential oil drops. Once the aromatherapy system is turned on, the diffuser spreads the natural scent of the essential oil into the ambient air.

Drop-In Bath Upgrades

Chromatherapy

Immerse yourself in a sea of light created by a dual mini-light Chromatherapy system. Bathers can choose between red, orange, yellow, green, blue, turquoise, and magenta, or cycle through a range of 9 blended colours. Combine Chromatherapy with a massage system to create a total spa experience.

Lateral Air

16 jets mounted around the perimeter of the bathing well infuse the water with a soothing stream of massaging bubbles. A ceramic heating core preheats the air as a 600-Watt Panasonic™ blower delivers a steady stream of warm air bubbles to the bather. Use the variable speed control pad to vary the intensity of the massage to your mood.

Enjoy peace of mind in knowing that all blowers are preprogrammed with an auto-drying cycle to clean and dry the system after every use.

HydroMassage

The hydromassage is the most vigorous of all available upgrades, featuring a $\frac{3}{4}$ hp high efficiency pump. Bath water circulates through 6 or more adjustable jets to deliver targeted massaging action with variable levels of intensity. Upgrade this massage system by adding additional jets or adding an in-line heater to help maintain your bath's water temperature.

ComfortWarm™

ComfortWarm™ uses radiant heat technology to directly heat the surface of the bathtub's backrest. Use the three heat settings to adjust the heat intensity at any time with a simple press of the electronic touchpad.

VIBE Sound

The Vibe System allows you to enjoy your music or radio at the touch of a button in your shower or bathtub. The vibes of the music are synchronized with a Chromatherapy system that will change colors in synch with every beat of your favorite music.

Aromatherapy

Only a few drops of fragrance are needed. The system works using a pump which leads the air towards the receptacle which is filled with a combination of water and a few essential oil drops. Once the aromatherapy system is turned on, the diffuser spreads the natural scent of the essential oil into the ambient air.

Freestanding Bath Upgrades

Chromatherapy

Immerse yourself within a sea of light created by a dual mini-light Chromatherapy system. Bathers can choose between red, orange, yellow, green, blue, turquoise, and magenta, or cycle through a range of 9 blended colours. Combine Chromatherapy with a massage system to create a total spa experience.

Lateral Air

16 jets mounted around the perimeter of the bathing well infuse the water with a soothing stream of massaging bubbles. A ceramic heating core preheats the air as a 600-Watt Panasonic™ blower delivers a steady stream of warm air bubbles to the bather. Use the variable speed control pad to vary the intensity of the massage to your mood.

Enjoy peace of mind in knowing that all blowers are preprogrammed with an auto-drying cycle to clean and dry the system after every use.

Roughin EZ

The Roughin EZ Drain provides an easy way to install a free standing bathtub. Kit includes a reusable test plug, twist lock coupling, brass tailpiece, nut and flat washer.

ComfortWarm™

ComfortWarm™ uses radiant heat technology to directly heat the surface of the bathtub's back-rest. Use the three heat settings to adjust the heat intensity at any time with a simple press of the electronic touchpad.

VIBE Sound

The Vibe System allows you to enjoy your music or radio at the touch of a button in your shower or bathtub. The vibes of the music are synchronized with a Chromatherapy system that will change colors in synch with every beat of your favorite music.

Aromatherapy

Only a few drops of fragrance are needed. The system works using a pump which leads the air towards the receptacle which is filled with a combination of water and a few essential oil drops. Once the aromatherapy system is turned on, the diffuser spreads the natural scent of the essential oil into the ambient air.

Semi-Freestanding Bath Upgrades

Chromatherapy

Immerse yourself within a sea of light created by a dual mini-light Chromatherapy system. Bathers can choose between red, orange, yellow, green, blue, turquoise, and magenta, or cycle through a range of 9 blended colours. Combine Chromatherapy with a massage system to create a total spa experience.

Lateral Air

16 jets mounted around the perimeter of the bathing well infuse the water with a soothing stream of massaging bubbles. A ceramic heating core preheats the air as a 600-Watt Panasonic™ blower delivers a steady stream of warm air bubbles to the bather. Use the variable speed control pad to vary the intensity of the massage to your mood.

Enjoy peace of mind in knowing that all blowers are preprogrammed with an auto-drying cycle to clean and dry the system after every use.

HydroMassage

The hydromassage is the most vigorous of all available upgrades, featuring a $\frac{3}{4}$ hp high efficiency pump. Bath water circulates through 6 or more adjustable jets to deliver targeted massaging action with variable levels of intensity. Upgrade this massage system by adding additional jets or adding an in-line heater to help maintain your bath's water temperature.

ComfortWarm™

ComfortWarm™ uses radiant heat technology to directly heat the surface of the bathtub's back-rest. Use the three heat settings to adjust the heat intensity at any time with a simple press of the electronic touchpad.

VIBE Sound

The Vibe System allows you to enjoy your music or radio at the touch of a button in your shower or bathtub. The vibes of the music are synchronized with a Chromatherapy system that will change colors in synch with every beat of your favorite music.

Aromatherapy

Only a few drops of fragrance are needed. The system works using a pump which leads the air towards the receptacle which is filled with a combination of water and a few essential oil drops. Once the aromatherapy system is turned on, the diffuser spreads the natural scent of the essential oil into the ambient air.

Walk-In Bath Upgrades

Chromatherapy

Immerse yourself within a sea of light created by a dual mini-light Chromatherapy system. Bathers can choose between red, orange, yellow, green, blue, turquoise, and magenta, or cycle through a range of 9 blended colours. Combine Chromatherapy with a massage system to create a total spa experience.

Lateral Air

16 jets mounted around the perimeter of the bathing well infuse the water with a soothing stream of massaging bubbles. A ceramic heating core preheats the air as a 600-Watt Panasonic™ blower delivers a steady stream of warm air bubbles to the bather. Use the variable speed control pad to vary the intensity of the massage to your mood.

Enjoy peace of mind in knowing that all blowers are preprogrammed with an auto-drying cycle to clean and dry the system after every use.

HydroMassage

The hydromassage is the most vigorous of all available upgrades, featuring a $\frac{3}{4}$ hp high efficiency pump. Bath water circulates through 6 or more adjustable jets to deliver targeted massaging action with variable levels of intensity. Upgrade this massage system by adding additional jets or adding an in-line heater to help maintain your bath's water temperature.

ComfortWarm™

ComfortWarm™ uses radiant heat technology to directly heat the surface of the bathtub's back-rest. Use the three heat settings to adjust the heat intensity at any time with a simple press of the electronic touchpad.

VIBE Sound

The Vibe System allows you to enjoy your music or radio at the touch of a button in your shower or bathtub. The vibes of the music are synchronized with a Chromatherapy system that will change colors in synch with every beat of your favorite music.

Aromatherapy

Only a few drops of fragrance are needed. The system works using a pump which leads the air towards the receptacle which is filled with a combination of water and a few essential oil drops. Once the aromatherapy system is turned on, the diffuser spreads the natural scent of the essential oil into the ambient air.
